## LAMINATE FLOORING

Golden Elite's **Laminate Flooring** is a multi-layer flooring product composed of a **High Density Fiber (HDF)** Board that simulates the look of wood using a lamination process, where there is a photographic applique layer under a **wear-resistant** overlay.

The wear-resistant overlay helps **protect** the boards from **scratches, burns, chemicals** and other imperfections for a longer lasting finish. Golden Elite's Laminate Flooring has superior economical performance and an extensive colour range.

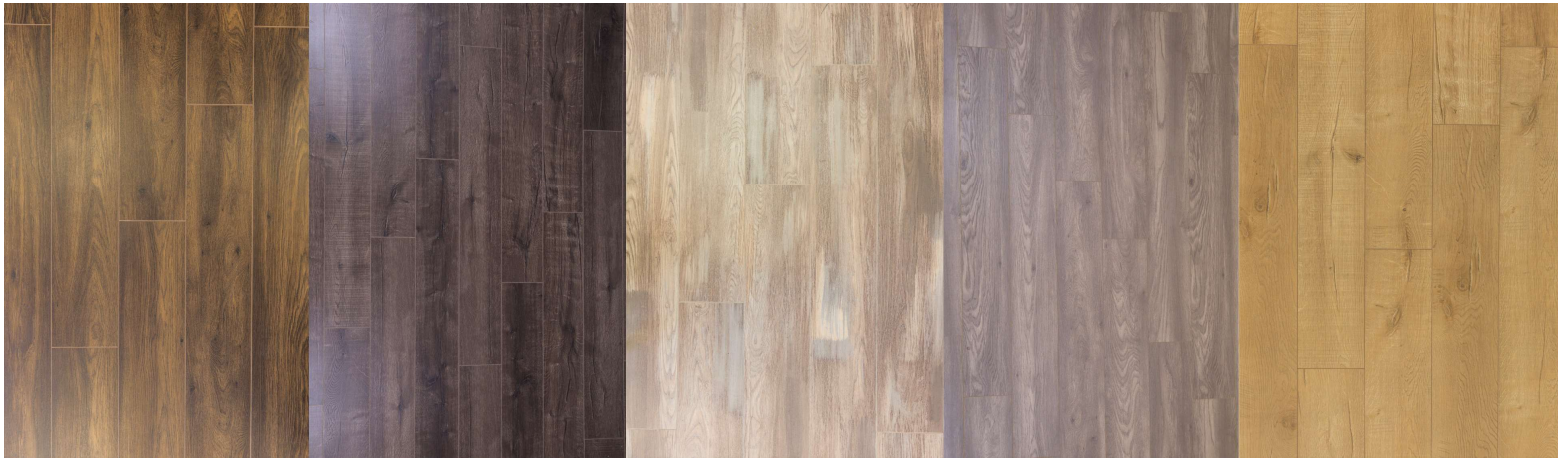

There are two different ranges for Golden Elite's Laminate, the **Elite Series** and the **Summit Series**.

The **Elite Series** comes in both **8mm (EIR & Crystal Finish)** and **12mm (EIR, Crystal & High Gloss Finish)**.

The **Summit Series** comes in both **8mm** and **12mm** in an **EIR Finish** with an abrasion class rating of **AC5** and a formaldehyde rating of **E0**.
